```
public class Solution {  
    // DO NOT MODIFY THE ARGUMENTS WITH "final" PREFIX. IT IS READ ONLY  
    public int findCount(final int[] A, int B) {  
        int cnt=0;  
        for(int i=0;i<A.length;i++)  
        {  
            if(A[i]==B)  
            {  
                cnt++;  
            }  
        }  
        if(cnt>0)  
        {  
            return cnt;  
        }  
        return 0;  
    }  
}
```
