

Print With Space

Difficulty: **Basic** Accuracy: **42.74%** Submissions: **35K** Points: **1** Average Time: **10m**

Given two inputs that are store in variables **a** and **b**, you need to print **a** and **b** in a single line with a space separating them.

Add new line after printing with space.

Examples:

Input: a = "Hello", b = "World"

Output: Hello World

Explanation: a and b are printed in a single line and a space separates them.

Code :

```
void utility() {  
    string a, b;  
    cin >> a >> b;  
    cout << a << " " << b << endl;  
}
```

Output:

Hello World
