Projects

Online Birth Certificate System

February-2022

- Developed a comprehensive online system for the application, verification, and issuance of birth certificates. The system was designed to streamline the registration process, enhance data accuracy, and improve accessibility for users.
- Designed and implemented a user-friendly web interface using HTML, CSS, and JavaScript.
- Utilized **MySQL within the XAMPP** environment to create a structured database for storing advertisement details, user information, and preferences, ensuring efficient data management.
- Developed a **user registration and login** system **using PHP and MySQL**, enhancing website **security** and offering a personalized experience for users.
