Website Assignment: Build a Personal Blog Homepage

Objective:
Create a responsive personal blog homepage using Bootstrap. The website should consist of a header, a hero section, a blog post grid, and a footer.

Requirements:

1. **Header Section:**
   - Include a navigation bar with the blog title/logo on the left and links (e.g., Home, About, Blog, Contact) on the right.
   - The navigation bar should collapse into a toggle button on smaller screens.
2. **Hero Section:**
   - A full-width background image with a centered heading and a subheading.
3. **Blog Section:**
   - Display 6 blog cards with a title, a short description, and a "Read More" button.
   - Arrange the blog cards in a grid:
     - Large screens (lg): 3 cards per row.
     - Medium screens (md): 2 cards per row.
     - Small screens (sm): 1 card per row.
4. **Footer Section:**
   - Include links for "Privacy Policy," "Terms of Service," and "Contact Us."
   - Social media icons arranged horizontally.
